

The Alzheimer's disease Avalanche

It's World Alzheimer's Day

21 September 2017

Alzheimer's disease is a form of dementia that effects about 40 million people world wide and as our population ages the numbers will grow.

It is a devastating diagnosis, one which effects not only the person with the diagnosis but their family friends and society.

Here at Therapy Professionals our Physio, Speech Language, Music and Occupational Therapists can help the person with Alzheimers, their family and friends manage this condition as well as possible at home.
