

World Day for Health and Safety at Work 28 April 2019

There is no doubt the workplace is a safer place to be than 100 years ago. However, as with all things in life, we have not yet got utopia in the workplace and there is always room for improvement.

On 28 April 2019 we challenge employers and employees to think about how they can make their workplace safer and happier places to be and put these ideas into action. This will improve productivity, profits and help you comply with your legal responsibilities.
