Physio, Speech Language, Music,
Occupational Therapists & Dietitians

26 March 2018 - Purple Day Supporting Epilepsy

Here at Therapy Professionals we have provided therapy services to many people of all ages with disabilities since 1985. One in fifty New Zealanders and many of our customers have had epilepsy at some point in their lives. It's not well understood by the general population and some types of seizures are very scary to observe and others may go unnoticed and be mistaken for inattention.

Visit the Epilepsy New Zealand website for information.
